*Supplied With Tool*

### Tune-Up Kit

- CA157719 (Incl: Nos. 8, 41, 53, 55, 62, 68, 92 & 115)

### Repair Kit RS (Model L)

- CA157719 (Incl: Nos. 8, 41, 53, 55, 62, 68, 92, 93, 94, 97, 98, 102, 105 & 115)
The goal of Chicago Pneumatic is to produce tools that help you work safely and efficiently. The most important safety device for this or any tool is YOU. Your care and good judgment are the best protection against injury. All possible hazards cannot be avoided, but we have tried to highlight some of the important ones.

For Additional Safety Information Consult:

- Your employer union and/or trade association.
- US Department of Labor (OSHA); www.osha.gov; Council of the European Communities europe.osha.eu.int.
- “Safety Code For Portable Air Tools” (B186.1) available from www.ansi.com

Air Supply And Connection Hazards

- Air under pressure can cause severe injury.
- Always shut off air supply, drain hose of air pressure and disconnect tool from air supply when not in use, before changing accessories or when making repairs.
- Never direct air at yourself or anyone else.
- Whipping hoses can cause serious injury. Always check for damaged or loose hoses and fittings.
- Do not use quick disconnect couplings at tool. See instructions for correct set-up.
- Whenever universal twist couplings are used, lock pins must be installed.
- Do not exceed maximum air pressure of 90 psi (6.2 bar) or as stated on tool nameplate.

Entanglement Hazards

- Keep away from rotating drive.
- Do not wear jewelry or loose clothing.
- Choking can occur if neckwear is not kept away from tool and accessories.
- Scalloping can occur if hair is not kept away from tool and accessories.
- Do not contact tool with accessories during and after use. Gloves will reduce the risk of cuts or burns.
- Use only proper accessory retainers (see parts list). Use deep sockets wherever possible.

Impact Wrench

- Always use the simplest hook-up possible. Long, springy extension bars and specially designed quick disconnect couplings at tool. See instructions for correct set-up and understanding these instructions before performing any such task.

Never operate the tool off of the work. It may run too fast and cause the accessory to be thrown off the tool.

Serious injury can result from over-torqued or under-torqued fasteners, which can break, or loosen and separate. Released assemblies can become projectiles. Assemblies requiring a specific torque must be checked using a torque meter.

Note: So-called “click” torque wrenches do not check for potentially dangerous over-torque conditions.

Workplace Hazards

- Slip/Trip/Fall is a major cause of serious injury or death. Beware of excess hose weight on the walking or work surface.
- High sound levels can cause permanent hearing loss. Use hearing protection as recommended by your employer or OSHA regulation (see 29 CFR part 1910).
- Maintain a balanced body position and secure footing.
- Be in control of the throttle at all times. Do not get caught between the tool and the work.
- Repetitive work motions, awkward positions and exposure to vibration can be harmful to hands and arms. If numbness, tingling, pain or whitening of the skin occurs, stop using the tool and consult a physician.
- Avoid inhaling dust or handling debris from the work process which can be harmful to your health. Use dust extraction and wear respiratory protective equipment when working with materials which produce airborne particles.
- Proceed with care in unfamiliar surroundings. Be aware of potential hazards created by your work activity. This tool is not insulated for coming into contact with electric power sources.
- Some dust created by power sanding, sawing, grinding, drilling and other construction activities contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Some examples of these chemicals are:
  - Lead from lead-based paints
  - Crystalline silica bricks and cement and other masonry products
  - Arsenic and chromium from chromatically treated rubber
  - Benzene from the manufacturing process

Risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as dust masks that are specially designed to filter out microscopic particles.

Additional Safety Topics

- This tool and its accessories must not be modified.
- This tool is not recommended for use in explosive atmospheres.
- Operators and maintenance personnel must be physically able to handle the bulk, weight and power of the tool.
- For professional use only.

Manufacturers’ Limited Warranty

Limited Warranty: The “Products” of the Chicago Pneumatic Tool Company (“CP”) are warranted to be free from defects in material and workmanship for one year from the date of purchase. This Warranty applies only to Products purchased new from CP or its authorized dealers. Of course, this Warranty does not apply to products which have been abused, misused, modified, or repaired by someone other than CP or its Authorized Service Representatives. If a CP Product proves defective in material or workmanship within one year after purchase, return it to any CP Factory Service Center or Authorized Service Center for CP tools, transportation prepaid, endorsing your name and address, adequate proof of date of purchase, and a short description of the defect. CP will, at its option, repair or replace defective Products free of charge. Replacements are warranted as described above for the remainder of the original warranty period. CP’s sole liability and your exclusive remedy under this Warranty is limited to repair or replacement of the defective Product. (There Are No Other Warranties Express or Implied And CP Shall Not Be Liable For Incidental, CONSEQUENTIAL, Or Special Damages, Costs Or Expenses Excepting Only The Cost Or Expense Of Repair Or Replacement As Described Above.)

EC DECLARATION OF CONFORMITY

We, Chicago Pneumatic Tool Company, 1800 Overview Road, Rock Hill, SC 29730 USA, declare under our sole responsibility that the product to which this declaration relates, is in conformity with the requirements of the Council Directive of 29 June 1989 on the approximation of the laws of the Member States relating to machinery (89/392/EEC).

Machine Name CP9561 Series Impact Wrench

Machine Type Assembly Power Tool for Threaded Fasteners - No other use is permitted.

Technical Data

3/4” (19 mm) Sq. Dr.; Std.
Air pressure 90 psi (6.2 bar)
Torque range 100–500 ft-lb. (136–680 Nm)
Ult. torque 260 psi (1.8 bar) 700 ft-lb. (950 Nm)

Harmonized Standards Applied EN 283
National Standards Applied ISO 8662-7, Pneurop PN8NTC1.2

Name And Position Of Issuer W.A. Le Nevve, President, Chicago Pneumatic Tool Company

Signature Of Issuer

Place And Date Of Issue Utica, NY, 13501 USA, July 31, 1994
