## YEARS OF INNOVATION

In Desoutter's earliest days one hundred years ago, who would have imagined that it would become today's global leader in its sector? How many industrial companies can claim, like Desoutter, to have weathered the years with such success, never forgetting the values that have formed the foundation of their prosperity?

This one century of existence would not have been possible without that drive for innovation that characterises our company, without that perpetual determination to evolve along with the changing world around us, always acting with vision to anticipate the needs of tomorrow.

This longevity is also the fruit of dedicated devotion on the part of all those employees who have shared their ideas, their skills and their technological expertise in order to turn that thrust for innovation into reality and to give it meaning.

But this history is also - and primarily - that of our customers and partners who remain the sole reason for our existence. It is for them and alongside them that we strive for perfection day after day, and our intention has been to pay tribute to them in the name of this shared success by compiling some of their testimonials in this book.

Together we have written the beginning of a great story. And together we will continue to move forward, to look to the future with the same ambition: always to offer "more than productivity".

# More Than Productivity

## Desoutter is your single source of electric and pneumatic tool solutions,

covering a wide range of assembly and manufacturing processes in the motor vehicle, aerospace, general industry and light assembly sectors

Desoutter has a long history of producing high-quality industrial tools. Today, the scope of the activity combines a global offering with a widespread local presence

The reason behind this approach is simple: our customers, who include many of the world's largest and most successful manufacturers, want worldwide access to a global portfolio of assembly and manufacturing solutions

With Desoutter, we provide you more than productivity

## FOCUSED ON YOUR OBJECTIVES...

Industry hates risk. And so do we. So we work with you to eliminate cost, quality and performance risks from your production lines.

### Optimize your investments

Your production lines are some of your company's most important investments. The quality and performance of Desoutter industrial tool solutions enable you to optimize your return on investments by producing more in the same cycle time. Our airline systems, for instance, keep our pneumatic nutrunners spinning at exactly the right speed and power, saving you precious seconds for each operation.

### Raise productivity

Good ergonomics makes good economic sense. Not only are Desoutter tools designed to reduce operator stress factors, such as vibration and noise, they also take into account the relationship between the operator, the tool and the process. Our experts work with you to obtain long-term gains in productivity and safety, while improving cost, quality and cycle times.

## GLOBAL SOLUTIONS YOU CAN BUILD ON...

We know that finding the best solution is about much more than just picking a new tool. That is why we start every project by opening our ears, not our catalog.

### Process optimization

Producing high-quality products requires high-quality processes. That is why many of the world's major motor vehicle, aerospace and appliance manufacturers rely on Desoutter. Each Desoutter solution is tailored to your exact needs. Our experts propose solutions that deliver a quantifiable return on investment, whether in terms of productivity improvements, quality gains or safety improvements.

### Worldwide coverage

Desoutter combines global reach with local expertise. To ensure the smooth running of Desoutter solutions in your factories, all our local teams are trained to the same high level of expertise and service. Each team is in direct contact with the Desoutter area application and customer care center for your region. Together they ensure that solutions are implemented to worldwide standards, but in compliance with local criteria.

## EXPERTISE YOU CAN GROW ON...

From motors vehicles to appliances, planes to construction machines, electronics to energy – there is a Desoutter air powered and electric tool solution for you.

## PEACE OF MIND YOU CAN COUNT ON...

Our support services keep your processes operating at maximum levels – and leave you to focus on your core business.

### Covering all segments

#### Motor vehicle industry

A wide range of tool solutions for vehicle makers, tier one suppliers and linebuilders. Solutions include fixed systems for powertrain assembly and handheld solutions for final assembly processes.

#### Aerospace

A long history of providing tools solutions to aerospace companies. We cover a wide range of their needs, from airframe and engine construction to system assembly.

### Customized solutions

Our Applications Centers are the symbol of our renowned flexibility. As comprehensive as our catalog is, we know that sometimes you need a tailored solution. Our Application Center engineers adapt existing solutions to your requirements and develop your own solutions. They are experts at developing Six Sigma tools and error proofing.

### Genuine Desoutter parts

Genuine Desoutter parts are the only parts designed and engineered specifically for Desoutter tools. They ensure that our tools always operate at their best. Moreover, for a lifetime of satisfaction, we always use genuine Desoutter spare parts when performing maintenance and repairs.

### Proactive logistics

When your operations are global, it is essential that your logistics are too. Our centralized inventory and warehousing system is highly responsive. We proactively manage our production to ensure a reliable supply of the products and parts you need. The majority of the solutions in our catalog can be shipped to you in three days, no matter where you are located. Next-day service is available in many markets.

## FOCUS

## KEY POINTS

BEST ERGONOMICS	HIGH TECHNOLOGY	QUALITY CONTROL
Ergostop technology to avoid RSI (Repetitive Strain Injury)	Smart embedded HMI on tool	Direct feedback for the operator
Perfectly balanced grip design	High resolution transducer	Visible tightening results on tool HMI
Rebalancing with the two different battery positions	New motor dedicated to battery tools: high speed, high torque, low temperature	Torque control and angle monitoring
Operator comfort

# The new standard of Value in Efficient Tightening...

In an era of FLEXIBLE manufacturing and the race to ZERO-fault assembly, Desoutter is proud to introduce the new standard of Value in Efficient Tightening for safety-critical applications: CVI3 assembly system

This new system offers unequalled EFFICIENCY for all plants thanks to the best combination of advanced process control, easy integration, user-friendly interface & unmatched flexibility

The CVI3 system integrates UNIQUE added value INNOVATIONS:  
**Reduce rework cost:** complete station process control including tightening

& logical operations without need for a dedicated PLC > **Assembly Process**  
**Decrease installation/re-balance cost:** Fast & easy line re-balancing with multiple Battery transducerized tools connected to 1 CVI3 controller > **EAB cordless tools**

**Improve quality with intuitive software:** User-friendly & visual interface to view tightening data & detect quality issues > **CVI ANALYZER**

**Optimize flexibility:** 2 fixtured spindles synchronized or asynchronous in standard > **TWINCVI3**

**ADVANCED

# Wireless transducerized battery tool

## ADVANCED ERGONOMICS

- Low weight tools
- Effortless trigger
- 45° oriented battery (angle version)
- Slim angle head for tight areas access

## INCREASED PRODUCTIVITY

- High speed tool and increased autonomy with 36V battery & 2.1 Ah capacity
- Embedded display for pset selection
- Strong & efficient wireless communication, tested in industrial environment

## EASY INTEGRATION

- Quick wireless installation - Directly on an existing CVI3 controller
- Data collection through wireless communication
- Improve error-proofing control with advanced tightening strategies
- Easy attachment for crowfoot & tubenuts

## OPTIMIZED MAINTENANCE

- Long life batteries, no memory effect on Li-ion battery
- Dust & oil proof trigger
- Common spare parts with all CVI3 range

# Workgroup System

## A multi spindle machine up to 14 fixtured spindles

One **TWINCVI3** or One **CVI3** Vision as a primary controller to synchronize and collect results from all controllers  
 Several **TWINCVI3** or/and **CVI3** Vision or/and **CVI3** Function as Secondary controllers

### All connection to the Primary:

- Ethernet network (CVI3 Config, CVI NET Web, Open protocol, HMI, etc....)
- Fieldbus like Profibus, Profinet, Ethernet IP, Devicenet, etc...
- 8 inputs and 8 outputs and much more with I/O expander
- eBus for:
  - Operator panel
  - Stack light
  - Socket tray
  - I/O expander

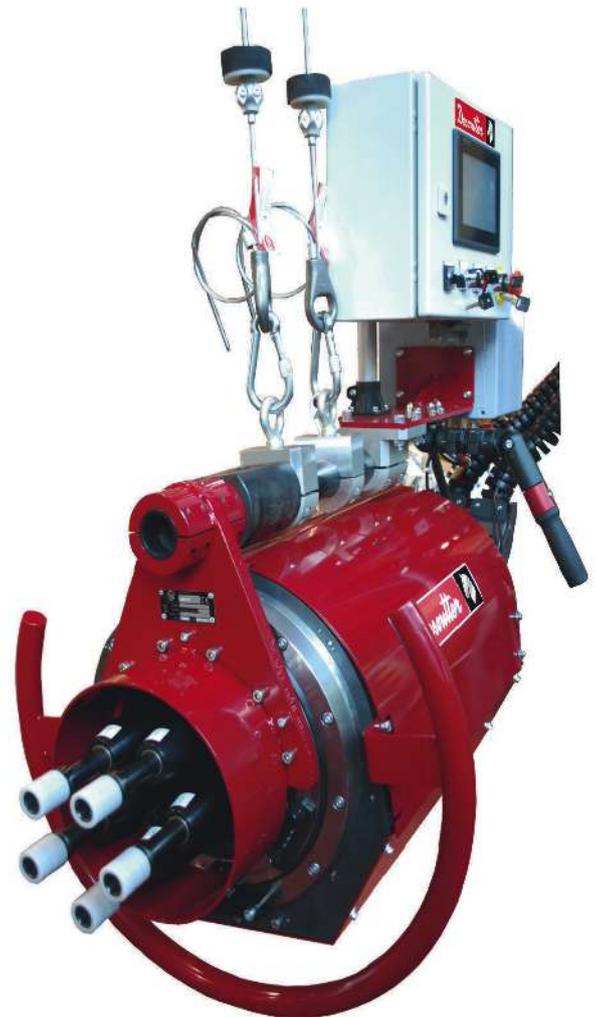

## FIXTURED SPINDLES

**EFDE:** straight with telescopic output  
**EFDS:** straight without telescopic output  
**EFDA:** angle head  
 Fully compatible with EME range via the adaptor

+

BENEFITS

Flexibility thanks to the use of standard controllers with an additional ePod3  
 Synchronization of the controllers via the integrated Ethernet network

### Advanced tightening strategies

- Optimization of tightening via CVI Config
- Torque and/or Angle control
- Yield point
- Plastic zone
- Redundant T&A transducer

**FACTORY ETHERNET NETWORK**

**INTERNAL ETHERNET NETWORK**

### Advanced monitoring

- The primary controller displays all tightening results and events and its own tightening curves.
- Each controller displays its own results, curves and events.

### Advanced Process control

- Multi tightening programs, 250 Psets with 40 steps, for all spindles or per group of spindles, action/retry in case of NOK.
- Assembly Process to manage multi Pset and simple processes.
- A soft PLC (CVI Logix) is integrated for more complex processes

# Programming and Real Time Monitoring Software

## CVI CONFIG - PROGRAMMING (INCLUDING CVI MONITOR)

## CVIKEY - ACCESS LEVEL MANAGEMENT

### FEATURES

#### CVI CONFIG to set any point to point or via network with an intuitive and guided interface

##### User-friendly interface

- Configurable complete Assembly line view in the tree area
- Easy Tool/PSet setting including Quick Pset & learning mode
- PSet steps definition with drag&drop feature and Intuitive settings with curve template
- Fast learning curve with contextual help
- Real time error-proofing consistency check

##### Advanced process control

- Complete process logic mapping including tightening & non-tightening operations with Assembly Process

##### High flexibility

- Dynamic mapping for I/O, fieldbus with drag&drop feature
- Including Geopositioning set up
- 2 ways transfer of all parameters between stations & PC
- Real time access to tool parameters/counters (partial/ total number of cycles performed by the tool/cable)
- Test mode to check torque transducer, angle encoder, brushless motor
- Complete backup/restore of stations

#### CVI MONITOR (included in CVI CONFIG) to monitor results, maintenance and diagnostic in real time

##### Real-time Monitor

- Results
- Curves
- Statistics
- Export in csv format

##### Maintenance

- read the counters of the tools, controller and cables
- set preventive maintenance alarms
- reset the counters and alarms
- tool calibration
- autocalibration with Delta 6D

##### User info History

- Alarms history (logs)
- Problem solving guidance

#### CVIKEY to create & manage tailor-made access rights per user profile

##### Tailor made protection

- Intuitive software to create/manage access level
- Protection guaranteed by unique profile keys created by the administrator (locked against copy)

##### Simple interface

- Plug&Play USB key
- 4 profiles already available by default

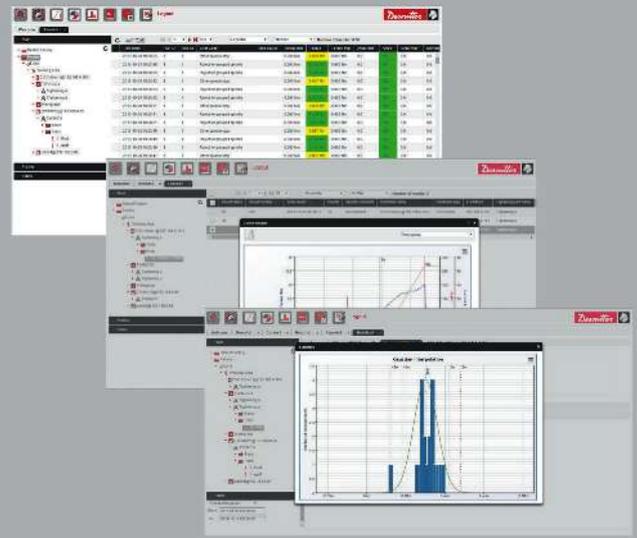

##### High flexibility

- Unlimited number of profiles
- Set up the right access level for the right

# Traceability and Data Collection Software

## CVI ANALYZER - TIGHTENING DATA ANALYSIS

## CVI NET WEB - DATA COLLECTION

### FEATURES

**CVI ANALYZER to import tightening data and analyze results thanks to customized filter and report.**

#### Flexibility

- Complete Factory and Assembly line layout definition
- Multi User Profiles definition
- Complete Factory and Assembly line layout definition
- Multi User Profiles definition
- Advanced customized filter definition
- Advanced data searching
- Multi tab view

#### Traceability

- Unlimited CVI3 results and curves collection in local DB through plant network
- Complete back-up solution
- PSet history
- Including data import from USB key
- Result and Curve export in cvs format

#### Analysis

- OK/NOK distribution
- NOK distribution reasons analysis

**CVI NET WEB to collect in real time 100% tightening data in server database and review with web based interface. Any PC connected to network can access to results without any software installation on different client, it's enough to type web page address.**

#### Full Traceability

- Real Time result and curve collection
- Real Time tightening errors
- Data storage in Server architecture
- SQL Server, Oracle, MySQL support
- Automatic uploading of missing data from Controller
- Alarm in case of disconnection and FIFO inside controllers
- Curve overlay

#### Statistical Analysis and Documentation

- Advanced OK/NOK reports and control charts
- Advanced NOK pareto analysis
- Cm/Cmk analysis according different standards (ISO, CNOMO, NF)

#### Flexibility

- Administrator User
- Customized Profiles and Filters
- Complete Plant layout definition
- Smart Identifier filtering

#### Report printing

- Export all results and curve directly from web page
- PDF, csv or txt export format
- Direct Printing from web page
- Printing of all tightening of a vehicle or a components by scanning the proper bar code

# CVix II Range

## Transducerized Tools

### Handheld Tools

- Brushless AC motor: virtually maintenance free
- Resolver: smooth angle control at any speed
- 6 leds OK / NOK signals

### Fixtured electric spindles

- Long life gear boxes
- Brushless motor
- High output torque transducer for a larger torque range

## Controllers

## Communication

CVIPC2000 software is a user friendly tool able to program tightening cycles, collect and display results and curves

CVINET WEB to collect & store 100% tightening data in real-time database with advanced analytics via a web based software in service mode from all Desoutter tightening controllers

# Controller - CVIR II

*Error proofing and flexibility*

Advanced control unit with flexibility and technology

- Easy integration into your assembly line with multiple choices of connectivity

## COMMUNICATION

- 1 Ethernet port for CVIPC or network communication
- 1 RS232 port to connect barcode readers or CVIPC 2000
- 8 Inputs and 8 Outputs
- 1 Optional fieldbus module

## Innovative Tightening Strategy

### Seating detection

Detect the screw head contact on your part by torque rate management, even with material variation

# MultiCVIL II - Main Features

## MULTICHANNEL SYSTEM

Drive up to 32 fixtured spindles  
One CVIL Master + x times CVIL Slave

Through CVIPC2000 (to Master only)

### Cycles Phases management

- 31 different cycles
- Combines up to 20 phases in a fastening cycle

### Data collection

- CVIPC2000
- CVINET WEB

### Fieldbuses

- By additional modules
- By Ethernet ports
- Flexible mapping

### Isagraf, embedded PLC software to manage:

- Assembly station
- HMI

## FIXTURED SPINDLES

- From 1 to 1900Nm
- EME straight
- EMEOF with Offset for close center distance application
- EMEL "L" shape reduces the height of the tool
- High accuracy
- A10 class
- Digital communication between the tool and controller
- Memory chip with all characteristics of the tool: transducer sensitivity, gear ratio, maintenance info, etc...

## ONE CABLE

- Motor power
- Digital connection of the transducer and memory device
- Up to 45 meters
- Design to be used in robot applications

# Flexibility of tightening process

## EASY PROGRAMMING OF THE TIGHTENING SEQUENCE WITH FULL SYNCHRONIZATION

### Run Down phase

Spindle 1-2-3-4-5-6-7-8-9-10

### Final Speed phase

Spindle 1-2

### Final Speed phase

Spindle 3-4-5-6

### Final Speed phase

Spindle 7-8-9-10

### Automatic Repair Action

Reverse all spindles and retry once  
Jump to phase 2

### End of the cycle

Reporting

# Fixtured electric spindles

## High durability of EME tools

- Long life gear boxes
- Brushless motor
- High output torque transducer for a larger torque range

# CVIC Range Current controlled

## Easy to integrate

Small size and smooth design for a simple installation.

Speed up the set up time by using the self learning process. Provides automatic set up for the tool to optimize your fastening process.

## Multi torque capability

Replace multiple pneumatic tools with one electric tool per station.

## Fastening quality guaranteed in all your products

Set up a batch count to ensure all bolts are tightened with correct strategy.

Batch NOK

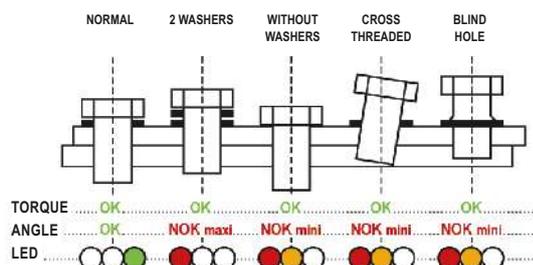

Batch OK

## Quality of tightening

Control torque and angle with multi phases strategies.

### Control torque & angle

\* Error proofing (torque + angle)

## Advanced ergonomics

Maximize your operators' comfort with ergo stop and direct reporting led in the controller and on the tool.

## Open to peripherals

Increase your assembly quality and process through barcode reader, socket tray or bit tray. Control tightening order with our positioning system.

# Electric High Torque Pistol Grip - CVIC

30 to 4000 Nm (22 to 2950 ft.lb) - 19 to 750 rpm

Over 360° Swivel  
for operator safety  
and comfort

## For your quality-critical applications

Impact and impulse tools have been a production favourite for many years.

This current controlled swing bar tool allows you a 1<sup>st</sup> step to switch from pneumatic to DC tools, error-proof your high torque tightenings in medium duty applications, save on energy costs and reduce your carbon footprint.

## Offering all benefits of Electric Brushless Tools

- Maintenance free motor
- Less than 70 dB(A)
- Environment friendly (no air, no oil)
- Repeatability and no need to re-torque
- One Tool = up to 15 different torque settings

# Posco 500 Positioning system

## Flexibility and control

Used in conjunction with encoders equipped arms stand or carbon arm, the system ensures that the tool is positioned at the right screw during the operation. An output signal will confirm to your PLC that the job is done.

## Easy programming

The Posco 500 system lets you program a sequence of operations by "self learning mode" and ensures that the steps are completed in the right order and in the right conditions.

Torque figures should be used as a guide only  
 Table assumes fasteners are new, lightly lubricated and of a standard finish  
 For lock nuts with a nylon insert, +10%  
 Torque values are recommended values for a working pressure of 6,3 bar (90 PSIG)

For non metric threads please use the following data as a guide.

 Nm x 0.73756 = ft lb  
 Nm x 0.102 = kgf m/kpm  
 Nm x 10.2 = kgf cm

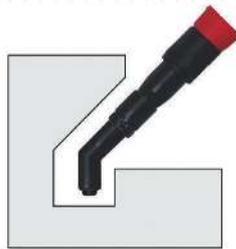

# Productivity and Ergonomics

## ACCESS

90° Angle Heads

45° Angle Heads

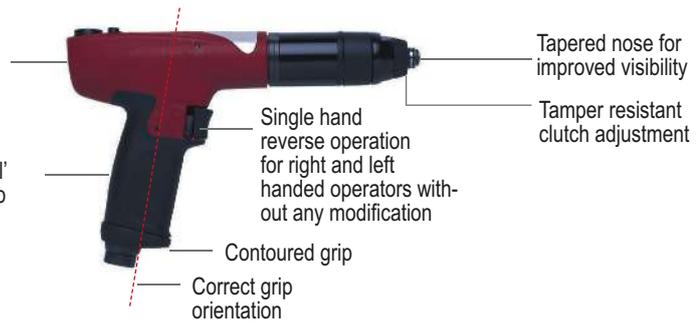

Crowfoot  
Open Ended Wrenches

## ERGONOMIC BENEFITS

- Lightweight
- Short Length
- Light Start Load

Pistol options of 'P' or 'T' style to suit the application and operator preference

'Warm feel' friction grip

For low vibration exposure and high productivity, select shut off tools where possible

## TOOL ORIENTATION AND OPERATOR PREFERENCE

### P Shape

Self Tapping/Forming/Cutting Screws  
Multi orientation  
Top air inlet  
Requires balanced tool

Use P Shape - arm in line with body of tool for thrust  
Use P Shape - allows wrist to rotate into position  
Can only use T Shape  
Use T Shape - especially with screwfeeder

### Push Start versus Lever Start

Fast Cycle Rate  
Single Hand Operation Required  
Need to Align/Position Components First

Use push start  
Use push start  
Use lever start or push + trigger start (SBP/SDP only)

### Button Reverse versus Rotary Reverse

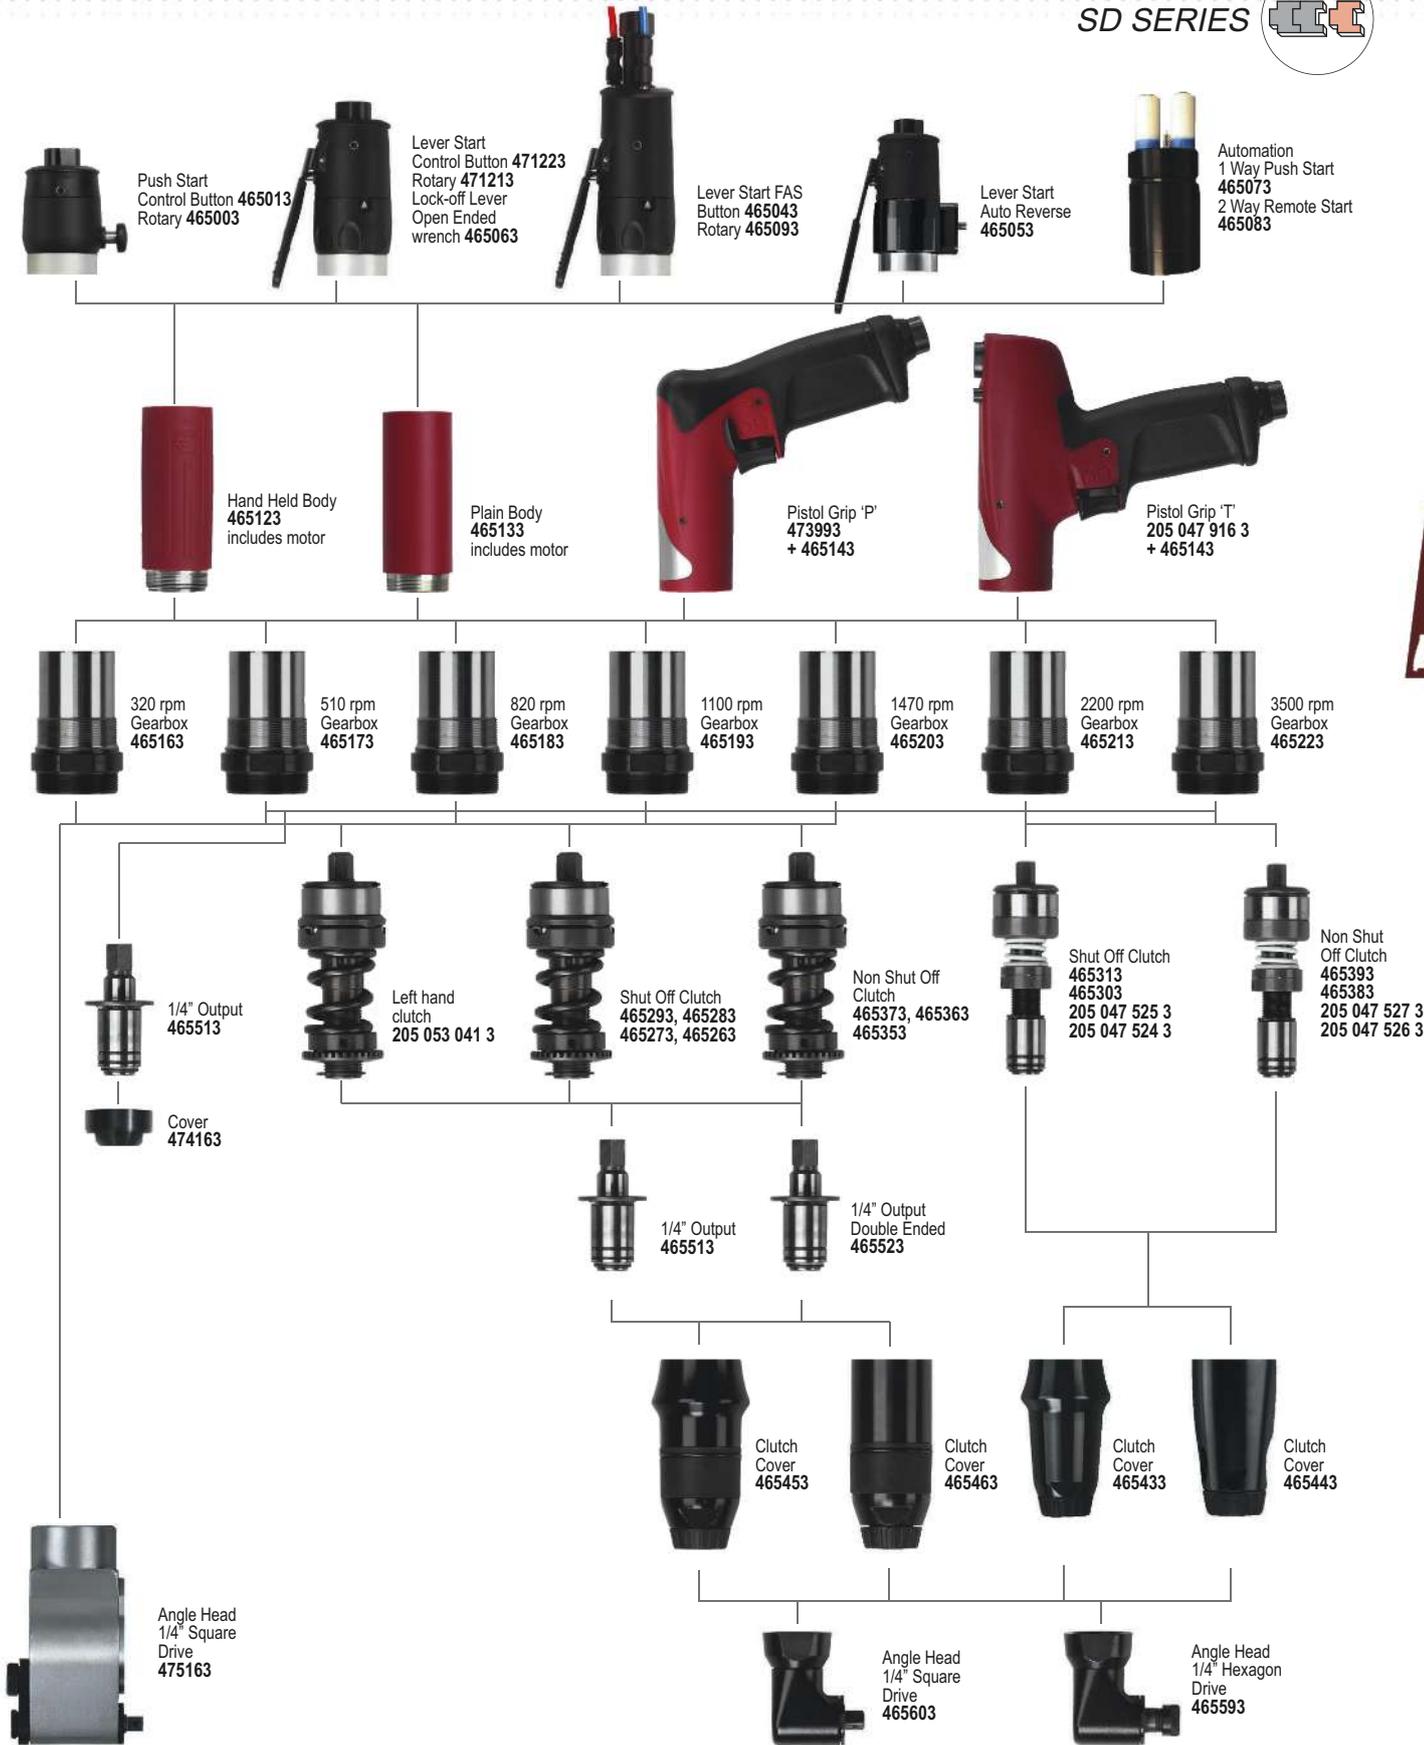

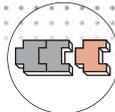

Rapid Reverse Required  
Thread Chasing Cleaning  
Rivnuts/Threaded Fasteners  
Long Periods in Reverse

Use button reverse  
Use button reverse (auto reverse for blind holes)  
Use auto reverse tools  
Use rotary reverse

# Screwdriver Torque Ranges

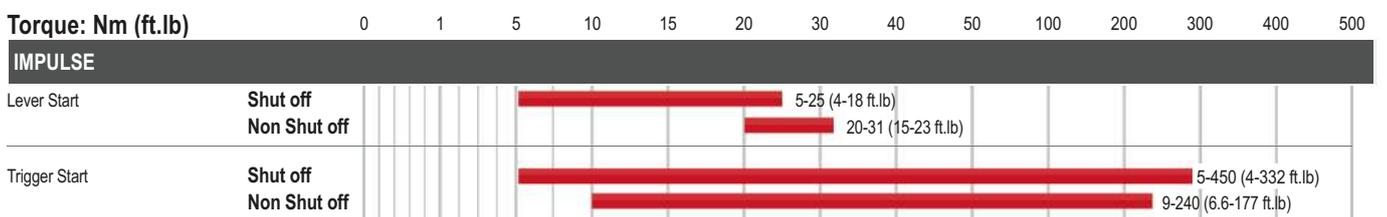

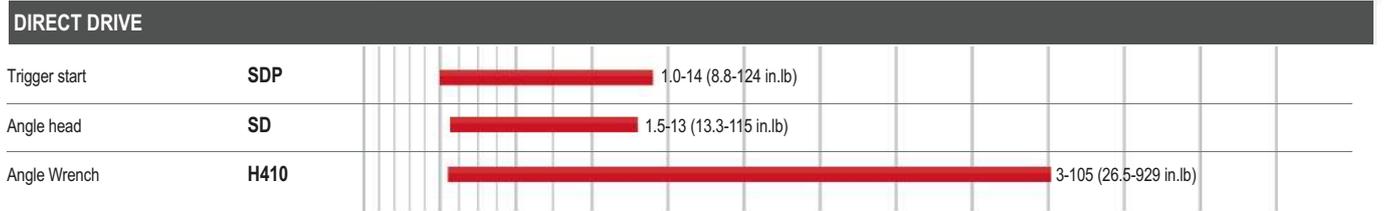

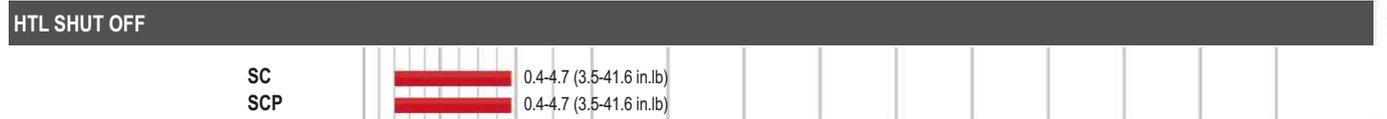

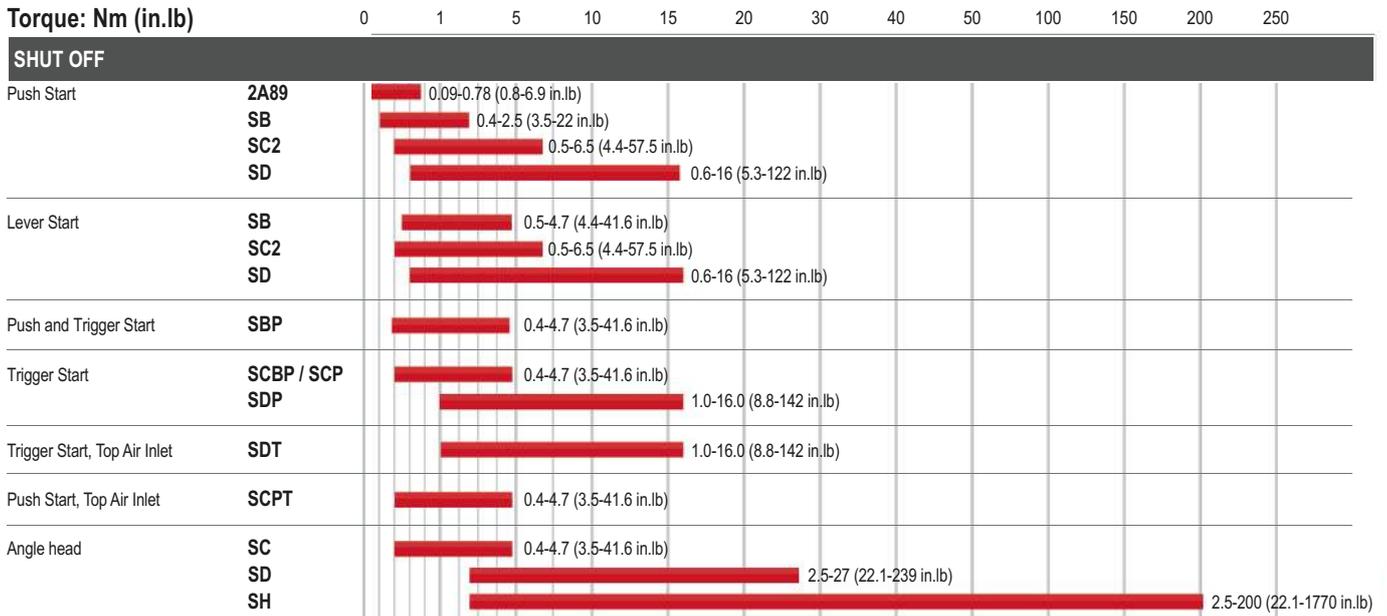

Torque output of the range of shut off and non shut off screwdrivers is controlled by the type of spring in the clutch assembly.

The overall torque range, together with that of the factory fitted spring on a soft joint to ISO5393 are listed in the tables on the following pages. The chart below provides an indication of the torque ranges for the optional colour coded clutch springs together with their respective part numbers (some are included with certain tools) As a general rule, the tool should be fitted with a spring which ensures the torque required falls within 20 to 80% of the operating range.

Please note that the torque range of specific speed tools may alter slightly from that shown below and for this reason the chart should be used as a guide only.

# Screwdrivers - Shut off HLT

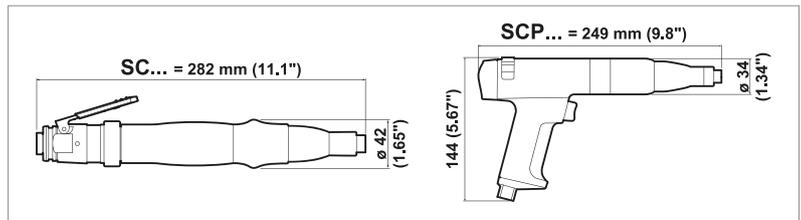

0.4 to 4.7 Nm (3.5 to 41.6 in.lb) - 550 to 1600 rpm

**A**

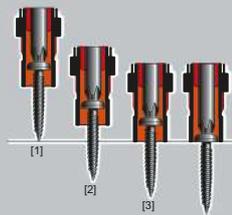

**B**

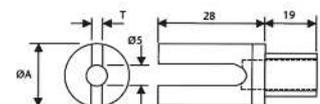

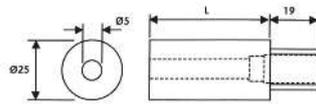

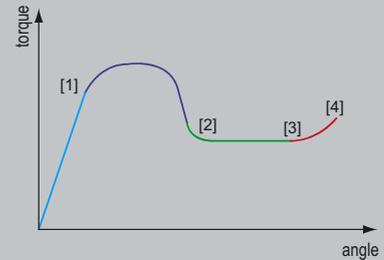

## TYPICAL HLT CYCLE

- 1 Tool starts to cut/form thread – direct drive
- 2 Thread is cut/formed, rundown continues direct drive
- 3 Depth stop touches component, drive engages clutch
- 4 Final torque achieved, clutch operates and air supply is shut off

Depth stop changes tool from direct drive to clutch operation

# FAS3000 - Fastening Assurance System

The FAS3000 – Fastening Assurance System provides the ability to verify that all the fasteners in an assembly have been correctly fastened without the level of investment usually associated with assembly control systems and additional inspection.

## Features

- Automatic and quick calibration
- 8 programs for different fastener profiles
- Up to 250 fasteners per program
- OK and Not OK visual indicators for each fastener
- Audible error warning for Not OK
- 'Group Cycle Complete' visual indicator
- Manual lockable reset switch
- Password protection of parameters
- 4 output sockets for interfacing with other equipment including inputs as well as output signals
- EMC approved

## Coded error messages

## START-UP KIT to be ordered with the FAS3000

By comparing the timing of pneumatic signals from a shut off screwdriver with set parameters, the fastening cycle can be monitored and output signals generated for OK and NOK

## OPERATING SEQUENCE

- $t_1$  = Minimum time
- $t_2$  = Maximum time
- Clutch operated before minimum time, lever/trigger released before minimum time
- Indicates crossed thread, screw too short, thread too short, too many washers
- Clutch operated within time limits - OK
- Clutch operated after maximum time Screw too long, no thread in component, stripped thread, no washers on assembly

# SH range - Angle head - Shut off

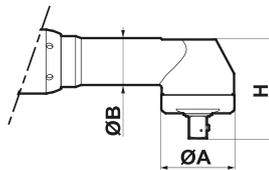

2.5 to 200 Nm (22.1 to 1770 in.lb) - 80 to 1100 rpm

Option:  
Reaction bar for SH850/1200/2000

FAS3000 (optional): PLC External control  
OK / NOK reporting Batch count

## PRODUCTIVITY

- High speed with joint stiffness capability

## QUALITY

- High accuracy with immediate shut off  
- Improve your process quality with FAS3000

## ERGONOMY

- Low reaction force on hard joint

## DURABILITY

- Low frequency maintenance  
- Quick service time

Maximum stall torque 105Nm

Performance will differ from the figures above depending on the regulator used

Data obtained from a lubricated air line

Torque figures are to be used as a guide only

\* Must never be used without regulator with a pressure higher than 4 bars

\*\* Must never be used without regulator with a pressure higher than 2 bars

**H410-N** – When using direct drive screwdrivers, it is strongly advised to equip the machines with a reaction bar to compensate against potentially high torque reaction and avoid operator injury

# Data Analyzer

Delta 1D / Delta 6D / Delta 7D

This generation of Delta analyzer is the compact portable solution to monitor all types of production tools at just 500g. Combined with standard Desoutter DRT or DST transducers it's capable of calibrating pulse tools, electric nutrunners or torque wrenches. Divided into three models for Torque measurement only (DELTA 1D), Torque & Angle (Delta 6D) and capable of residual torque check and production strategy with DWTA wrench (Delta 7D)

## MAIN FEATURES

- Display: Large color screen shows clear test results, Torque&Angle curves. Real time statistics, Tools description and Routes
- Connectivity: Ethernet and USB port for Delta QC software communication and RS232 for CVI II, CVIC II and CVI3 calibration or barcode reader
- Power: Li-Ion high capacity battery of 16 hours of autonomy or external power supply
- Transducer: Standard Desoutter connector for digital transducers. Analog CMD and GSE transducer connection through an adapter
- Barcode (Delta 7D): Embeddeb Barcode for automatic Pset selection or VIN traceability

# DWTA

Digital Wrench for Torque and Angle Measurement

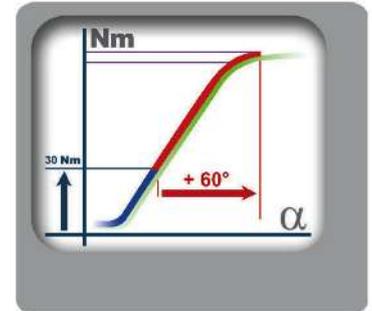

**PRODUCTION AND QUALITY** strategies: In combination with Delta 7D, the torque and angle wrench for residual automatic torque check and Joint analysis with Yield point detection.

Tightening within torque limits

Tightening within torque and angle limits (tightening to a window)

Tightening with torque and additional angle rotation (torque + angle)

■ DWTA

■ Non Length Dependent Transducer thanks to double bridge strain gauge. To guarantee a tightening result independent from operator hand position 1% of torque reading (from 10% to 100% of torque range)

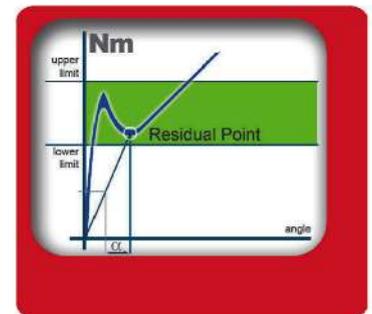

■ Delta7D

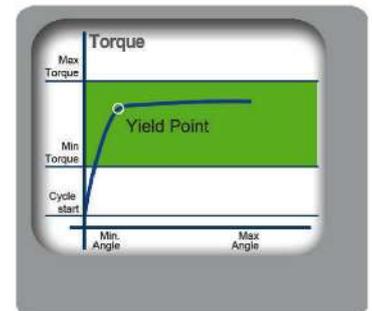

■ Military connector for standard transducer cable

■ Gyroscope for angle measurement.

# Delta Wrench

Digital Wrench for Torque & Angle Measurement

The digital wrench integrates is a unique device and flexible solution for both production and quality strategy in tightening. Delta Wrench provides high accuracy solution for torque controlled joints tightening. Delta Wrench ensures perfect tightening operator independent thanks to automatic PSet selection and double bridge transducer, also introduces a quality strategy with angle measurement and traceability for a perfect quality audit.

Non Length Dependent Transducer thanks to double bridge strain gauge. To guarantee a tightening result independent from operator hand position

1% of torque accuracy along a wide range

Standard interchangeable heads

Wrench accessories see page 126

Intelligent RFI-TAG for PSet automatic selection

USB Port for DELTA QC free software communication for programming 10 predefined PSet or to Export result in XLS report

Optional Wireless Communication

Ergonomic keyboard to recall the predefined PSet

Backlight RGB colour display for operator guidance plus acoustic buzzer

Embedded high capacity Li-Ion battery

Optional gyroscope for angle measurement

# Production Strategies

Tightening within torque limits

Tightening within torque and angle limits (tightening to a window)

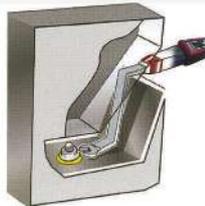

Tightening with torque and additional angle rotation (torque + angle)

## BENEFITS

- Accuracy for critical tightenings
- Wide torque range to replace click wrenches
- Production data traceability
- Repair station fastening capability
- Difficult access joints tightening
- Re-hit detection
- Low calibration cost
- Back up tool

Extension Application

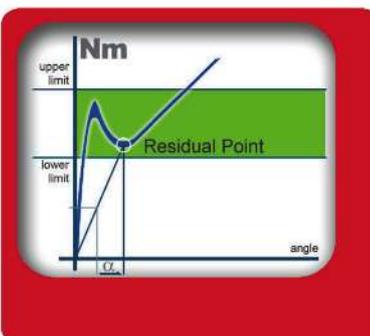

## TECHNICAL SPECIFICATION

10 predefined Pset	Pset with T/A limits defined by Delta QC Software
Batch Count	Up to 99
Production Strategies	Torque/Time, Torque & Angle, Torque + Angle CW/CCW Tightenings
Quality Audit Strategy	Peak Torque, Torque plus Angle Automatic residual detection CW/CCW Tightenings
Torque Accuracy	1% of torque reading +/- 1 digit
Angle Accuracy	+/- 1%
Battery	Li-Ion Battery
Power Autonomy	up to 10 hours for stand alone, 8 hours for wireless
USB Communication	Bi-directional communication to Delta QC Software
Results	1000 + 10 curves with Delta Licensed QC
RGB Display	Red Green or Blue backlight
Buzzer	Extension Torque and Angle bending correction
Multi-units	N•m, N•cm, Kg•cm, Kg•m, Oz•in, Lbf•in, Lbf•ft
Languages	French, English, Spanish, Italian, Deutsch, Portuguese
Software	Free Delta QC software to define Pset and downloads results

# Quality Strategies

Perfect for joint inspection and auditing Delta Wrench detects automatically the real residual torque of the fastener.

Automatic residual point detection

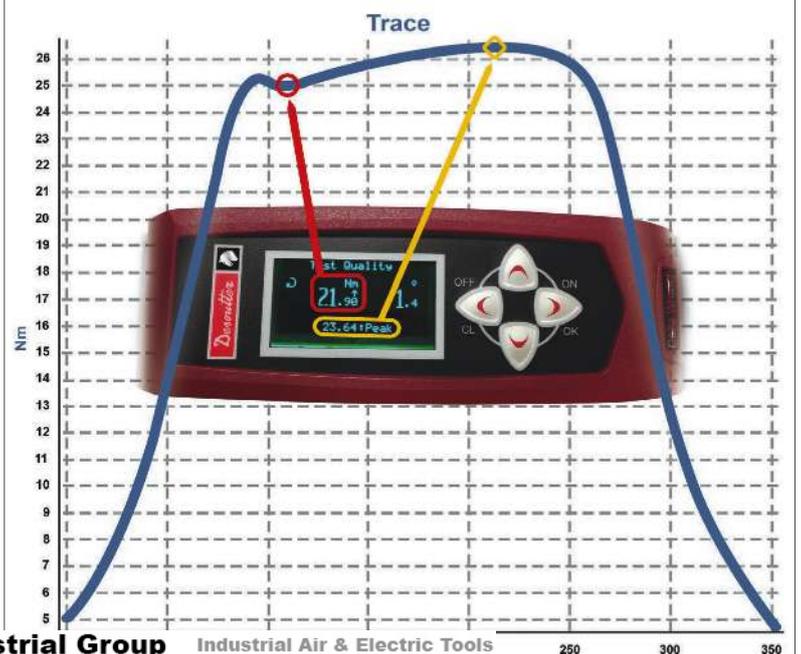

## BENEFITS

- Real residual torque value without any special programming or setting from operator
- Save time no PC setting are required
- No risk to release an over loaded fastener as mean value is saved
- Residual value operator independent
- Export data for quality & statistic analysis
- Perfect for fast & accurate pulse tools setting

High resolution torque/angle automatic algorithm

Double result detection Residual + Peak Torque

# E-LIT BOX

## FOCUS

1. Wireless communication
2. Fast to connect
3. Safe report
4. Visual feedback

■ Standard E-LIT Box Communication

## CHARACTERISTICS

- 1 Wireless communication**
  - Low consumption
  - Fast connection
  - Long range communication
  - Industrial wireless communication system (with 802-15-4 Technology)
- 2 Fast to connect**
  - Automatic free channel search
  - Easy pairing process
- 3 Safe report**
  - Memorize up to 25 OK/NOK reports if lost communication
  - Possibly to lock if memory full
- 4 Visual feedback**
  - Feedback directly on Wrench display
  - Wireless communication
  - Tightening OK / NOK

# Delta Wrench ZigBee

## WIRELESS SYSTEM

802-15-4 Standard

### 8 available outputs including:

- OK
- NOK
- Tool ready
- Tool disable
- Batch complete

### 4 available inputs including:

- Lock tool
- Unlock tool
- Unlock tool and reset

## EASY PAIRING PROCESS

■ No PC needed to pair E-LIT Box and Delta Wrench, just fast selection from wrench display

# Low Torque Analyzer

■ Embedded Transducer & Battery

## TECHNICAL SPECIFICATION

Torque Transducer	Embedded
Torque Accuracy	1% of readings
Tools Testing	Torque Wrench, Nutrunner or Pulse Tools
Statistic	Min. Max, Average, Standard Deviation
Results Storage	1000 + 10 curves with DeltaQC Licenced
Multi-units	N.m, Kg.m, Kg.cm, Oz.in, Lb.in, Lb.ft, N.cm
Display	Red, Green, Blue backlight
Power Supply	Embedded Battery External power supply
Battery Autonomy	Up to 12 hours
Languages	French, English, Spanish, Italian, Deutsch, Portuguese
Software	Free Delta QC Software to export by USB result

# Alpha Low Torque Analyzer

## MAIN FEATURES

- Alpha D Series is designed to monitor and collect torque check results from screwdrivers, torque wrenches or click wrenches.
- Ideal to tune the tools thanks to real time statistics on color display and high capacity torque results storage.
- Traceability with included software result acquisition with time stamp, including PDF or XLS reports.
- Three models with embedded transducer to cover torque range from 0,1 to 16 Nm. All models are provided with two included joint simulators to test nutrunner according to different joint stiffness condition.

■ Backlight RGB color display with acoustic buzzer

■ Hard & Soft Joint Simulator

# Digital Rotary Transducers

Torque

## TORQUE ROTARY TRANSDUCER:

The Rotary Torque Transducer DRT4 is designed to measure the torque output of any non-impact assembly tool. The transducer is suitable for use with impulse type assembly tools brushes with minimal maintenance requirements.

### BENEFITS

- Automatic recognition thanks to internal memory chip storing main data values eliminating any setting mistakes and time losses.
- High reliability due to immunity from external noise thanks to digital communication.
- Communication to data analyzer not sensitive to the cable length.
- Long life durability thanks to industrial design from transducer to housing.

### FEATURES

- Torque range from 0,2 to 5000 Nm (0.15 to 3685 ft.lb).
- Strain gauges transducer: - sensitivity 2mV/V - accuracy +/-0.35% of torque reading.
- Built-in smart chip memory with calibration features: - type of transducer - sensitivity nominal load - serial number.

FEATURES

- Torque range from 0.2 to 1400 Nm (0.15 to 1032 ft.lb).
- Angle counting system 0.35° resolution.
- Strain gauges transducer: - sensitivity 2mV/V - accuracy +/-0.35% of torque reading.
- Built-in smart chip memory with calibration features:
  - type of transducer - sensitivity nominal load - serial number.

# DJS - Digital Joint Simulator

A wide range of mechanical joint simulators are available to reproduce the joint behavior; installing the joint simulator on a transducer allows you to test a tool in the same real working conditions. Each joint simulator reproduces a specific stiffness as described in its torque/angle characteristics. For each capacity, there are two versions: one reproducing a softer joint and one reproducing a harder joint.

# Calibration Bench

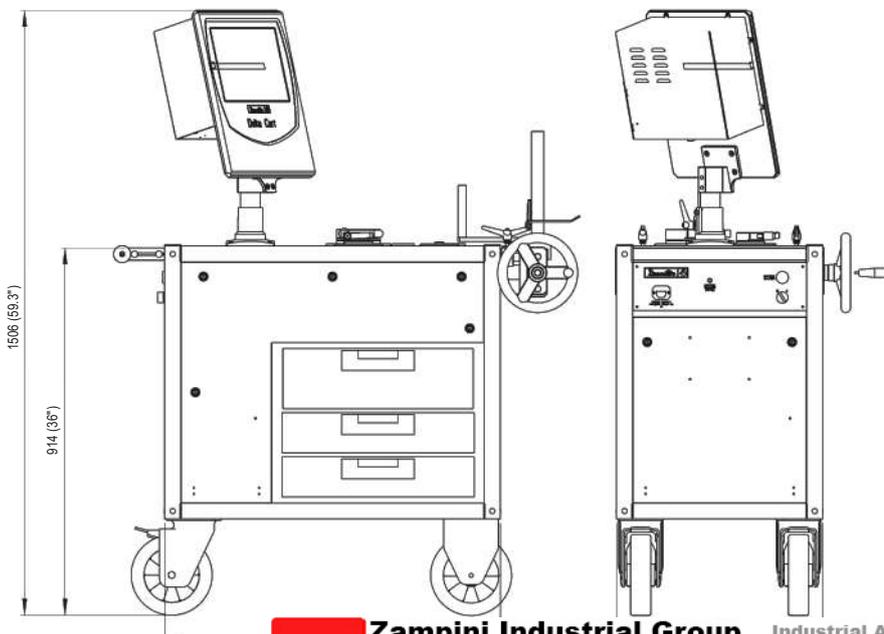

## EMBEDDED TRANSDUCERS:

Assembly tools calibration process requires a flexible and versatile solution, high quality performance even in production lines. Desoutter Tools is proud to present the Delta Cart, an ergonomic and attractive solution to improve quality in assembly processes.

■ Delta Cart offers a wide torque range since it can be configured up to 4 static transducers to cover from 0.2 Nm to 1 000 Nm (0.15 to 738 ft.lb) in a very compact dimensions (510mm width), making the Delta Cart the ideal solution for tool testing in assembly production lines.

■ Embedded PC equipped with wide 12" color touch screen lets operators to start tool testing in a few seconds and few steps.

■ Delta Cart includes all adapters, reaction bars and suitable joint simulators. Optional ISO RIG for torque wrench to eliminate operator influence during calibration, reducing efforts for high torque range.

Electric and Pneumatic Nutrunner

Shut off and non shut off Pulse Tool

Torque wrench

Click wrench

The Delta Cart is able to follow your tools during the complete life span: by performing capacity test (Cm/Cmk) before tool is introduced into production, or monitoring tool performance during production assembly process by performing Statistic Process Control (SPC) test

### TECHNICAL FEATURES

- Configurable torque range from 1 Nm to 1000Nm
- Torque reaction bar and joint simulator included
- External DRT communication for in-line calibration
- Angle Strategy with external DRT5

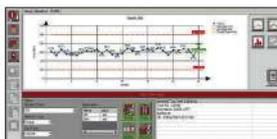

## Embedded Software with local tool DB (SQL Server) containing all Tool of the line including:

### ■ Calibration STATUS

### ■ Cm/Cmk Reports

### ■ Next Calibration

### ■ X/R Charts

■ PST High accuracy static transducers with locking system specially designed for pulse tool calibration

■ ISO RIG System for torque wrench calibration

### CLIENT - SERVER Architecture

■ Ideal for >1 cart management

■ All Calibration data always synchronized with unique Server database

■ Fast Ethernet communication

### ROUTE MANAGEMENT

■ Send to Delta Cart just the Tool to be tested

### SOFTWARE FEATURES

Torque Wrench, Electric or Pneumatic Nutrunner Test, Pulse Test Cm/Cmk - ISO 3534	Local Test Database up to 30000 Tests - Setting: Nominal Min Max Torque, unit of measure, Test Id, Test Description, Transducer number, Timeout setting Cm/Cmk, min, max, average, sigma

# Optimized Workstation

**Fig. 1**  
Holding tools in an ergonomically neutral position

Ergonomics deals with the interactions between operators and their work equipment, work environment and work process

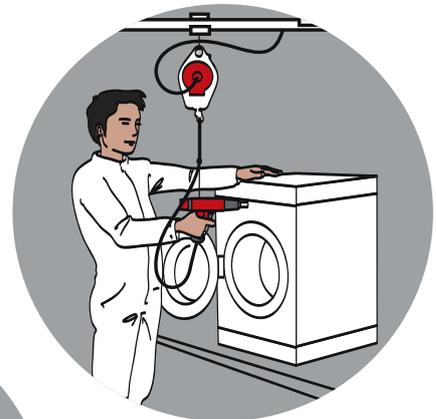

Ergonomically designed work systems enhance safety, effectiveness and efficiency, improve human working and living conditions, and counteract adverse effects on human health and performance

Desoutter has been developing products to improve the comfort of use and counter balance some of the below situations:

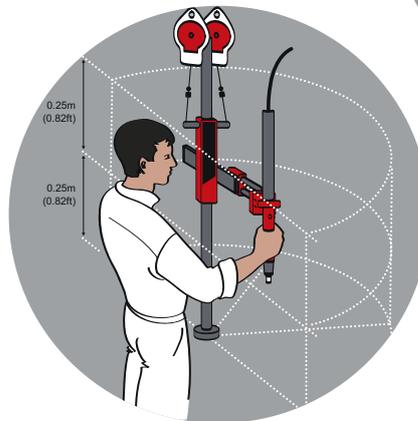

1. Hand position on the tool: based on application a straight or pistol grip tool is suggested (Fig. 1)
2. Tool position in the workspace: easy to reach and at the right height to minimize the unnecessary movement of the operator (Fig. 2 and 3)
3. Forces exerted: pulling force, torque reaction and the repetitiveness of these forces (Fig. 2 and 3)

The potential benefits of using Desoutter ergonomic accessories together with tools as described in this brochure are:

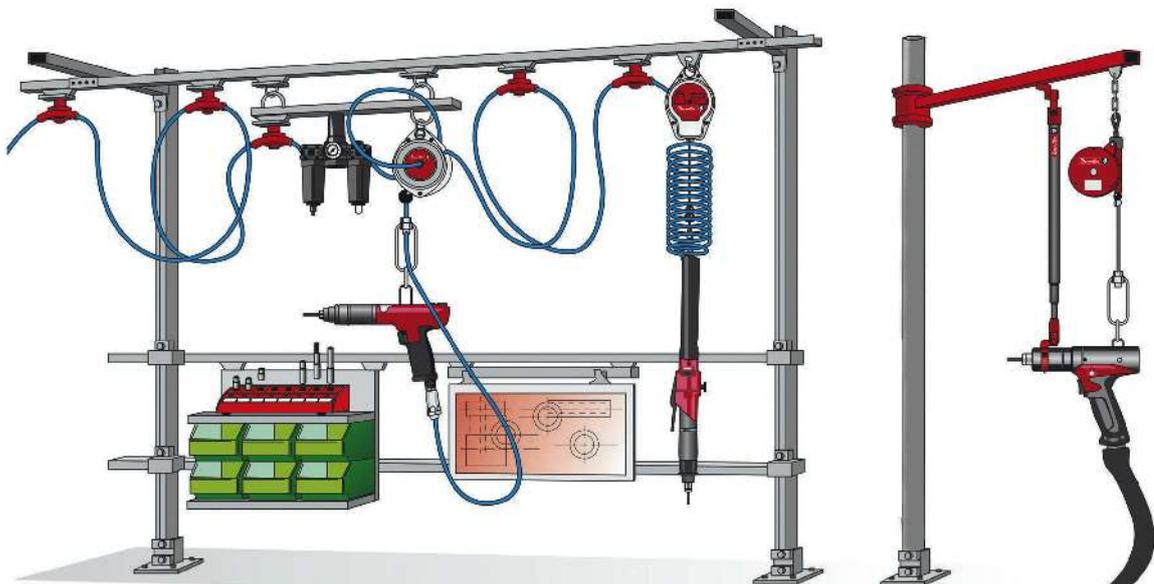

- Reduce repetitive stress injuries (RSI)
- Reduced operator fatigue
- Greater productivity
- Improved quality
- Reduced handling time
- Greater operator satisfaction
- Lower recruitment costs

# TRA - Telescopic reaction arms

## Telescopic carbon arm: Ideal for busy workspace!

- From 12 up to 200 Nm (8.9 up to 148 ft.lb) torque capacity
- Several lengths available
- 90 degrees tool clamp interface for straight or pistol grip tools
- Limited tool clamp angle rotation to avoid side forces in the operator arm ( $\omega$ ) (Fig 1)

### Benefits:

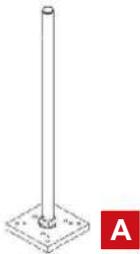

- Extremely lightweight carbon made torque arm for improved comfort of use
- Flexible solution

# TRA - Positioning telescopic arms

## TRA with positioning system allows to track the tool position during the assembly process

Same telescopic arm as the standard one: from 12 to 200 Nm (8.9 to 148 ft.lb) torque capacity

### 2 different versions:

- 1 encoder: length measurement
- 2 encoders: length measurement + angle control
- This arm is intended to be used together with our POSCO 500 to program a complete fastening sequence
- Accuracy: +/- 5mm

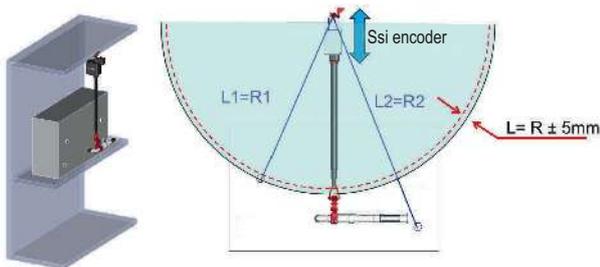

Need to order a balancer separately See page 163

# Tool holsters

## Desoutter Tool Holster - DTH42 - DTH-90

### DTH-42

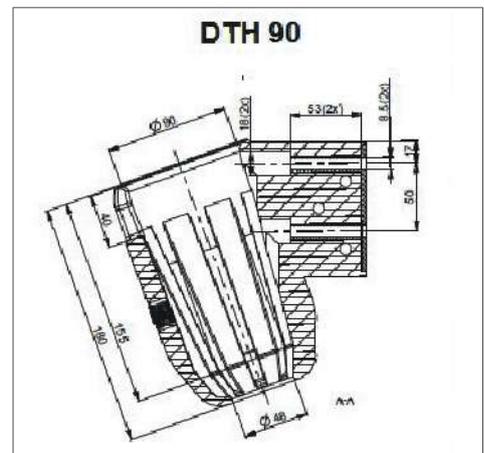

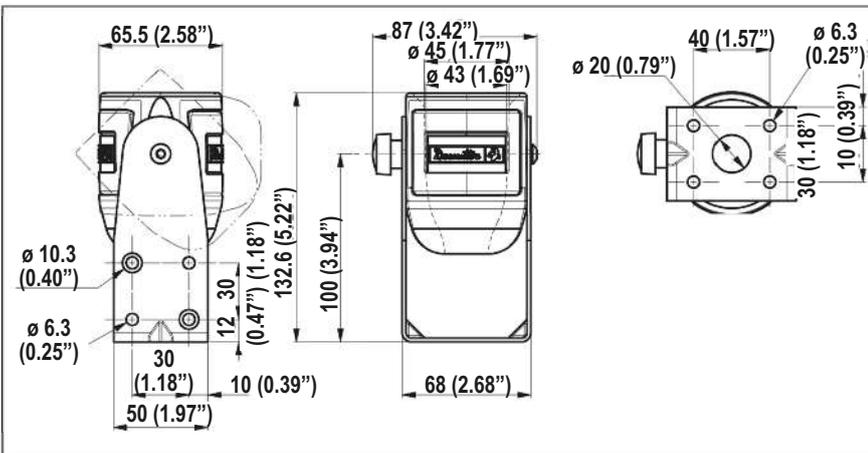

- Adapted for all **straight or pistol grip tools** with an outside diameter of maximum 42 mm
- The mounting plate can be fastened in **several positions** and the plastic ring angle can be set at **different angles**

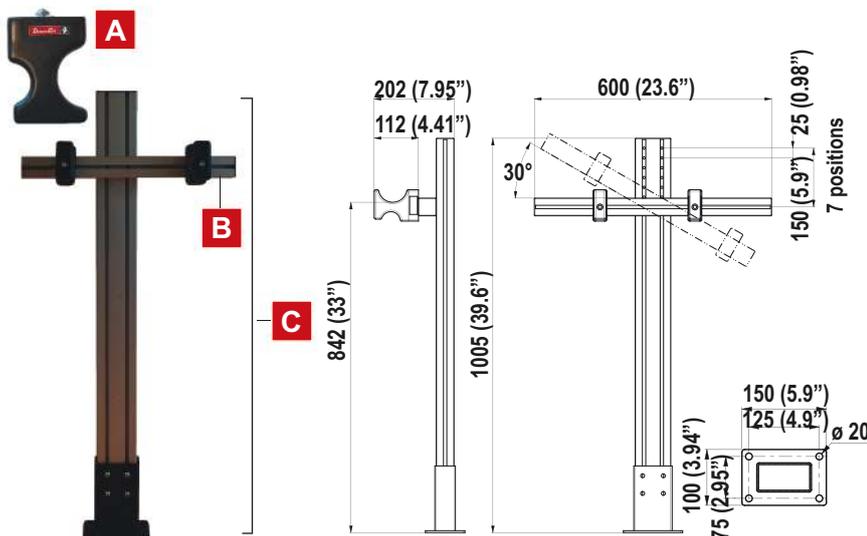

### DTH-90

- Used for all **pistol grip tools** with an outside diameter of maximum 90 mm
- Designed with 2 holes for tool sensors presence
- Rubber material
- Mounting screws included

# ASD - Automatic screw dispenser

## TO BE USED FOR THE ASSEMBLY OF:

- Electronics: TV, mobile phones, computers
- Medical products
- Small appliances

## Boost your productivity and efficiency

- **Widest range of screw sizes:** between 1.0 (0.04") and 5.0mm (0.197") thread diameters (about 11 different screw sizes) including screws with captive washers and up to 19mm (3/4") screw length (under head)
- **Complete:** supplied with universal feeding rail to avoid buying additional and expensive spare rails
- **Fully adjustable:** vibration time, vibration intensity, and drum rotation time adjustments allow the user to optimize the screw feed rate
- **Quiet operation & easy to service**
- Includes: rail adjustment kit, AC adapter and ground wire

## 1 STEP OPERATION - DRILLING – REAMING - COUNTERSINKING

Part of Desoutter product portfolio, **Seti-Tec line** offers best-in class performance, quality and reliability for the most demanding drilling applications worldwide.

Seti-Tec solutions have already been adopted by all major Aircraft manufacturers worldwide

This concept is dedicated to highly demanding drilling, reaming, countersinking applications, where quality, precision and repeatability are critical.

Its innovative design make one step drilling, reaming, countersinking possible, and will help driving down your cycle time.

Its design based on modularity concept and the wide variety of clamping options will answer most of your applications.

In addition to the current ST1200 and ST220 pneumatic range, the Electric Drilling Unit range **éVo** is raising the drilling performance to a new standard.

# Rack Feed Drills

- The Rack Feed Drill is a semi-fixture (nose mounted) portable drilling unit, utilising a manual feed through an integral "rack and pinion" mechanism to accommodate the approach drilling and retract cycles. This provides the user with complete control of the feed rate during drilling and allows the user to "feel" the feed rate required. Versatile and flexible, especially when drilling laminates and sandwich materials.
- RFD is suitable for drilling/reaming various materials used in the Aerospace industries e.g. Inconel, Titanium, Steel, Aluminium and Composites.

■ **RFD-100**  
 Speed range 60 to 2800 rpm  
 102mm (4") adjustable stroke  
 13mm (1/2") chuck capacity

■ **RFDT-125**  
 Speed range 60 to 800 rpm  
 127mm (5") adjustable stroke  
 No. 2 Morse taper spindle

\* 'C' dimension is for flush set only. 'C' varies on cupped sets according to rivet size and type of head.

## Rivet set length calculation

To develop maximum power, the riveter must drive (set) the rivet at the end of the riveter's stroke  
For maximum power the combined length of the two rivet sets must be of the correct length

$$A1+A2 = H-M-Z$$

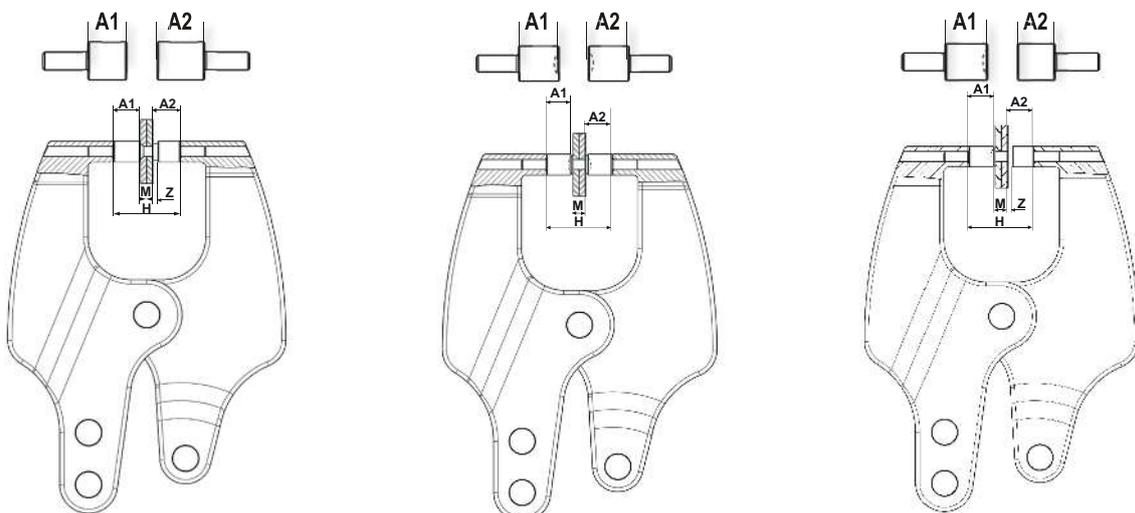

A1: Rivet set thickness (mobile jaw)

A2: Rivet set thickness (fix jaw)

H= Opening at the end of the riveting

M= Total thickness of material to be assembled

Z= height of finished rivet head (flush)

Two Flushed rivet set

# Compression Tools – Sheet Metal Punch

## CP0351-PU

- **Punching Capacity:**  
 $\varnothing$  4.8mm (3/16") in aluminum through 4.8mm (3/16") material thickness
- **Actuation throttle guard:**  
 reduces the risk of accidental operation
- Use for a wide range of punching operations where it is preferable to take the tool to the job. e.g. large structures such as truck trailers

### Capacity:

Maximum hole is  $\varnothing$  13mm (1/2") relative to material and thickness.  
 Within maximum force of 24.0 kN – 5,400 lbs, material thickness should not exceed hole diameter.  
 To determine force required use formula:  $F = 3.14 \times D \times T \times S$   
 where 'F' is force (lbs); 'D' is hole diameter (in.); 'T' is thickness of material (in.); 'S' is tensile strength of material (psi) or 'F' is force (kN); 'D' is hole diameter (mm); 'T' is thickness of material (mm); 'S' is tensile strength of material (N/mm<sup>2</sup>).

# Compression Tools – Edge Former

## CP0351-CABH-DY

- Forming Capacity (max material thickness) – 6.4mm (1/4")
- Rotary Suspension Bail fitted – eases handling and orientation of tool
- Use for a wide range of flattening of spot welded flanges and removing bends
- Custom yokes and dies can be used for crimping and staking operations
- Automatic cycling frequency is adjustable from 1 cycle per throttle actuation to up to 200 cycles per minute whilst the throttle actuation is maintained.

# AFD Applications

## Ease of Integration into Machine or Process

- Extensive range of mounting clamps
- Control interfaces to link AFD(E) to other equipment through pneumatics or electrically
- Single signal required for AFD(E) to perform cycle
- Output signals at datum and depth
- Electric motor mounting on 200, 400 and 600 series can be rotated 180°

## Comprehensive range of Product

- For single spindle operations to multi spindle processes
- Pneumatic and electric drive from 0.22 to 1.1kW (0.3 to 1.47hp) with thrusts up to 1735N (390lbf)
- Reliability through quality

[desoutter.info/AFD](http://desoutter.info/AFD)

## Modular Design

- Flexibility of unit function and speed
- Common components in different models reduce inventory
- Multiple spindle head options
- Drilling and tapping options for all models

# Air Motors

## ADVANTAGES

Air motors are versatile power sources which can be used to power many kinds of operations requiring a rotational drive. They have many advantages over electric motors, and often become the only feasible method of operation.

Desoutter offers a wide range of rotating vane air motors in **stainless steel** and **lubrication free** versions, with power ranging from 0.16 KW (0.21 hp) to 2.8 KW (3.75 hp). Most motors can be supplied as either unidirectional with a threaded shaft or reversible with a keyed shaft. Alternative output options are also available.

Desoutter air motors can also be **Atex certified** for environments with potentially explosive atmospheres.

Air motors are an ideal solution for many applications in such varied equipment as material handling, packaging, strapping or printing machinery, petrochemical and agricultural equipment, food processing machinery, and many more custom and standard machines.

Air motors offer many advantages over electric motors, and are often the only feasible option for driving.

# Air Line Accessories

Desoutter Air Line Accessories are specially developed to be used with Desoutter Tools & Equipments

Desoutter Air Line Accessories can also be used with other pneumatic products

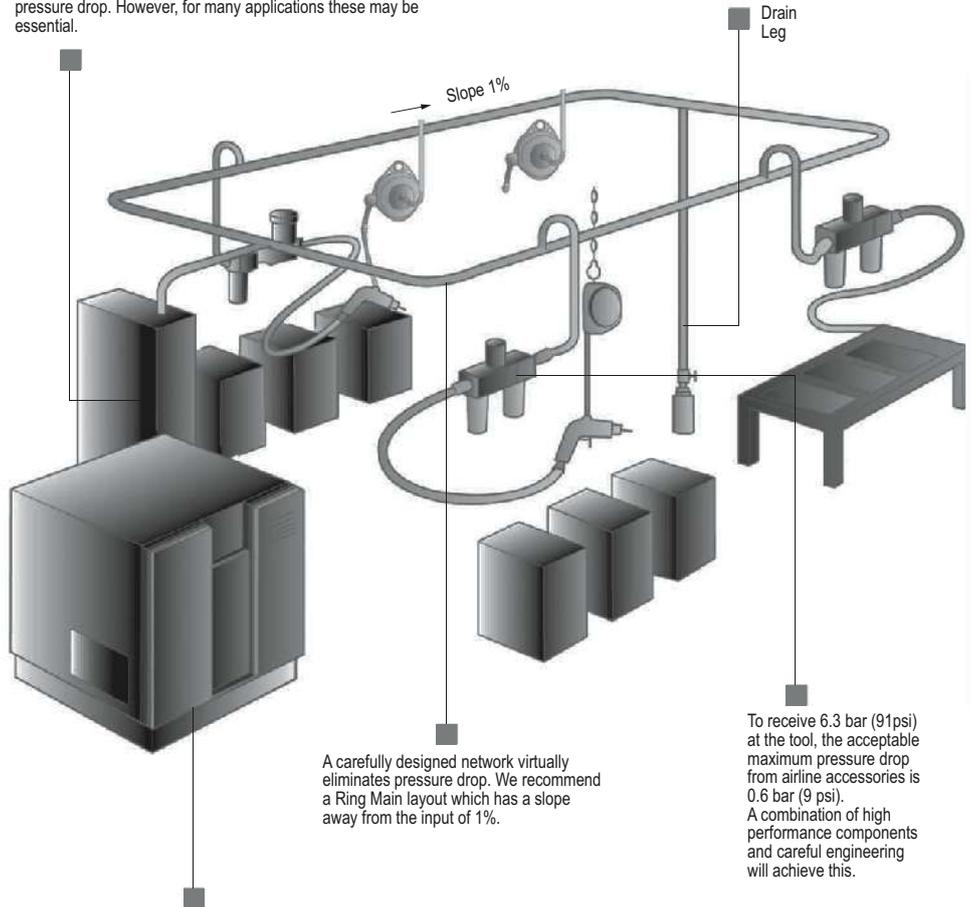

All accessories can be used for other applications with any pneumatic equipments

Desoutter Air Preparation Units are designed to help you get maximum performance from your tools

They ensure minimal pressure drop and thus minimum energy losses in the air distribution system, benefiting the environment and cutting your operating costs

The lifetimes of your tools will be extended by using air preparation units and with that comes lower repair costs and less downtime. A correct air installation guarantees productivity and good total economy

Air dryers and filters can cause a 0.2 - 0.3 bar (3-4 psi) pressure drop. However, for many applications these may be essential.

When developing the Desoutter Air Line Accessories range, we have focused on Performance, Quality, Ergonomics and Safety. Based on this, we now offer a wide range of accessories for optimal air line installation.

Our accessories enable to reach higher productivity with lower energy consumption, a sustainable reduction of energy costs and an extended lifetime of your tools

## Performance

In order to get the best performance out of your air line installation it is key to supply air at a constant pressure (6.3 bar) This, together with minimizing the pressure drop, is the primary focus when designing the Desoutter couplings, hoses and FRLs

The result is not only a better performance in terms of a reduction of energy costs but also in a better lifetime of the tools

## Ergonomics and Safety

To further improve the comfort of use for our customers we now offer hoses in our EFFI line with lower weight and more flexible. In combination with Easy Flow, Safety couplings, Airflex and high quality balancers you can build up a workplace where the operators' safety and ergonomics are in focus

## Quality

All our products are developed to perform in industrial applications. Desoutter Accessories are made with the highest quality materials to ensure the best possible performance and lifetime of

# Air preparation units

## FILTERS, REGULATORS, LUBRICATORS

Why should you use a filter, regulator and lubricator ?

The use of a filter, regulator and lubricator (in that order) for pretool air preparation is strongly recommended by Desoutter. Proper air preparation will result in improved tool performance and increased tool life. The units should be mounted as close to the tool as possible, preferably right where the tool hose is connected to the system. To realize their full value, these units should be checked on a regular assigned basis by maintenance workers or the operators themselves

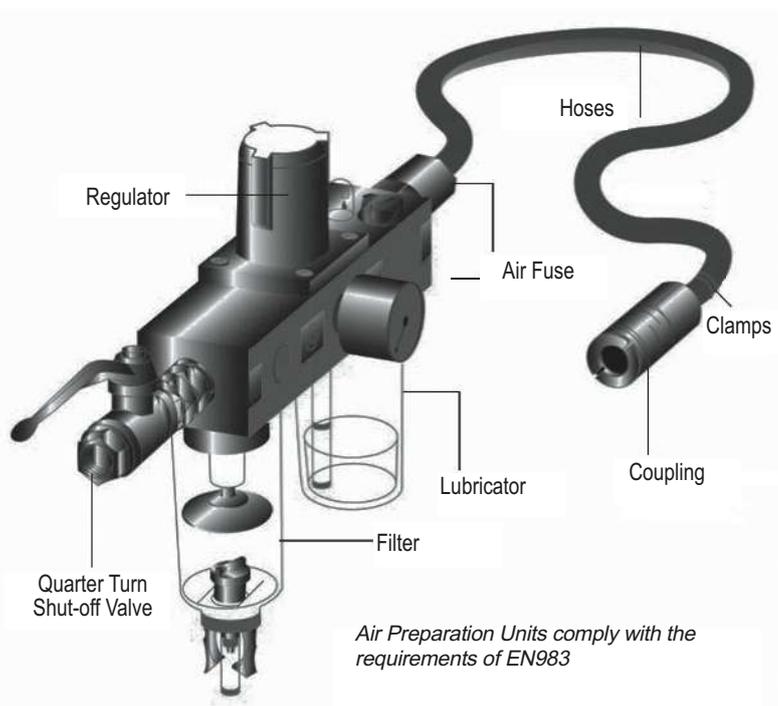

### Air filter

Filter separates impurities such as water and solid particles.

Not using filters in combination with air tools leads to shorter service life, higher maintenance costs and lower efficiency. Old air systems with cool dryers, for instance, generate a lot of rust and running tools without installing a filter could damage the tool in less than a week. Desoutter filters separate up to 98% of the water when operating within their working range. All three types (Small, Medium and Big) are very low pressure drop.

### Regulator

The regulator ensures that the pre-set working pressure remains constant - regardless of pressure variations in the intake air and minor variations in the airflow rate. For example, a pressure of 1 bar higher than necessary results in a 16% increase in air consumption. Spring controlled regulators are quick acting and therefore should be used for all types of air tools.

TOOL PRESSURE	AIR CONSUMPTION
91 psi (6 bar)	100 %
101 psi (7 bar)	110 %
116 psi (8 bar)	125 %

### Lubricators

If lubricators are not used, tool motor vanes will need to be changed more often. The life of the vanes may decrease to as little as 1/10th of the normal working time. The oil fog lubricator is the most common type of lubricator. It supplies a mist of oil to the air hose.

DIFFERENT TYPES OF FRL	PORT SIZE IN.	AIR FLOWS AT 6 BARS CFM (L/S)
Small units	1/4 3/8	Up to 19 (9) Up to 29.7 (14)
Medium units	1/2	Up to 78.4 (37)
Big units	1	Up to 175.9 (83)

## FEATURES AND BENEFITS

High air flow capacity: up to 104 l/s (220 cfm) to cover most of the pneumatic tool needs  
 Available in kits: 1/4", 1/2", 3/4", BSP or NPT, 2 or 3 stages units or individual units.  
 Durable design including quick release bayonet metal bowls for rough working environments

- (1) Liquid level indicator on the bowls for improved reading
- (2) Filter with 5µm element pre-installed to optimize the air cleaning and with automatic drain valve
- (3) Supplied with metal pressure gauge 0-10 bar (0-145 PSI) with metric and imperial scales
- (4) 10-17 bar (145-245 PSI) inlet / outlet max. pressure
- (5) Micro fog lubricator to optimize the air/oil ratio
- (6) Automatic drain valve
- (7) Manual drain

# Hoses

Desoutter offers the highest quality of PVC, Rubber and Polyurethane hoses in the Industrial Line to cover the different needs of applications with Power Tools

In addition to this, the EFFI series is designed with special features such as low weight and flexibility, to meet the highest ergonomic demands, as well as antistatic for applications with ESD demands

## HOSES

At recommended air flow the pressure drop is 0.2 bar (2.9 PSI) with a hose length of 5m (16ft). Recommendation is to upgrade one size in diameter for every 10m (32.8ft) of hose length

## EFFI Series

EFFI is a unique premium line of hoses designed with special features such as antistatic, extreme low weight, resistance and durability that will help the operator to maximize the tool productivity.

### EFFI MAX HOSES

Aimed to generic grinding applications

- Extreme low weight
- Antistatic
- Rubber hose
- Soft and flexible
- Welding spatter resistant

## POLYURETHANE SPIRAL HOSE

Spiral hose are especially adapted for tools used at varying distances. Vertically or horizontally, together with a balancer spiral hose, it is a step forward in ergonomics. Equipped with ball bearing at one end (except the 11x16), they can be directly connected at the tool outlet, avoiding the hose to twist

- Self retractable

# AIR FLEX

## AIR FLEX RANGE

**THE NEW AIR FLEX MAKES ALL RIGID HOSES FLEXIBLE AND MULTI-DIRECTIONAL.**

Easy: less effort due to hose rigidity, makes work easier in hard to reach areas.

Less wear: no more premature hose wear.

Comfort and safety: no twisting, the hose remains in the ideal working position and lower the risk of tendinitis.

## AIR FLEX

Aimed to improve the working ergonomics, Air flex connectors can rotate 360° eliminating efforts when working in cramped spaces

## AIR FUSES

When a fitting comes loose from a pressurized hose or the hose is damaged, the hose starts to blow an excessive amount of air in an uncontrolled way, causing hose whip. This can cause injury, and damage to the workpiece and environment.

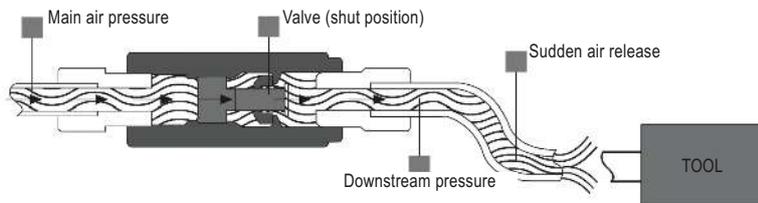

A way to ensure that this doesn't happen is to use an Air Fuse

It reduces the likelihood of potentially dangerous hose whip caused when a hose bursts or a fitting becomes detached. It quickly shuts off the supply and resets automatically as soon as back pressure in the line downstream is restored.

Air Fuses help to meet OSHA requirement 1926.302 (USA) and may eliminate the need for restraining or shielding hose, as required by European Standard EN983.

MATERIALS	
Body	Anodised aluminium
Internal parts	Brass
Spring	Stainless steel

- Reduces risk of hose whip, helping to protect personnel
- Simple and reliable design
- High life expectancy
- Aluminium anodised body for high corrosion resistance
- Auto-Reset to restart downstream activity with the minimum downtime

### AIR TOOL SIMULATOR / AUDIT CASE

DESCRIPTION	PART NO.
Air tool simulator	615 811 009 0
Audit case	615 811 353 5

Air tool simulator:

To check whether the pressure or air flow is sufficient

The air tool simulator will be connected instead of the pneumatic tool

Supplied with different connections

Audit case:

Intended to conduct tests measuring the dynamic pressure at the tool inlet

# Couplings

Desoutter offers a wider range of couplings to create the best possible solution together with Power Tools. The range consists of four types of couplings with different characteristics, all with the focus on quality, ergonomics and performance. To cover most of the global needs Desoutter offers three types of nipple profiles, Euro-, ISO 6150B- and the Asian profile. With the Easy Flow coupling Desoutter can present a unique coupling with no air restriction, minimizing the pressure drop. Thanks to its innovative design EF is suited for rough environment and it is easy and secure to connect and disconnect with the push and bend principle.

The safety feature in EF and Safety Couplings are vented versions to minimize the risk of sudden separation of coupling and nipple.

# Safety Instructions

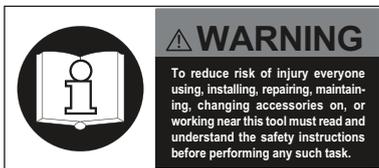

## General Safety Instructions for the Operation of Power Tools

The goal of Desoutter is to produce tools that help the operator work safely and efficiently.

The most important safety device for this or any other tool is the operator. Care and good judgement are the best protection against injury.

All possible hazards cannot be covered here, but we have tried to highlight some of the important ones.

Individuals should look for and obey Caution, Warning and Danger signs placed on tools and displayed in the workplace. Operators should read and follow safety instructions packed with each tool. For a copy of these instructions, contact your local Desoutter representative.

Learn how each tool works. Even if you have previously used similar tools, carefully check out each tool before you use it. Get the 'feel' of it and know its capabilities, limitations, potential hazards, how it operates and how it stops.

All tools are designed to operate at a line pressure of 6.3 bar +/- 0.15bar in accordance with ISO2787, 8NTC1.2.

Sound levels +/- 3dB(A)\* are measured in accordance with EN ISO15744. Vibration values\* are measured in accordance with ISO8662 & ISO28927.

\*These declared values were obtained by laboratory type testing in accordance with the stated standards and are suitable for comparison with the declared values of other tools tested in accordance with the same standards. These declared values are not adequate for use in risk assessments and values measured in individual work places may be higher. The actual exposure values and risk of harm experienced by an individual user are unique and depend upon the way the user works, the workpiece and the workstation design, as well upon the exposure time and the physical condition of the user.

We, Desoutter, cannot be held liable for the consequences of using the declared values, instead of values reflecting the actual exposure, in an individual risk assessment in a work place situation over which we have no control.

Tools are CE marked to comply with European Machinery Directive.

Specifications subject to change without prior notice.

Further occupational health and safety information can be obtained from the following web sites:

<http://www.osha.gov> (USA) <http://europe.osha.eu.int> (Europe).

### COMPRESSED AIR HAZARDS

- Air under pressure can cause injury. Never point an air hose at yourself or anyone else. Never blow your clothes free of dust with compressed air. Always direct exhaust air away from yourself and others in the work area.
- Always check for damaged or loose hoses and fittings before using an air tool, and replace if necessary. Whipping hoses can cause serious injury.
- Disconnect the tool from the air supply when not in use, before changing accessories, setting the torque, or when making repairs.
- Do not exceed rated air pressure to increase the output of the tool. This could cause injury and shorten tool life.
- Do not assemble quick coupler on the tool. Vibration can cause breakage resulting in a whipping air hose. Instead, use quick couplers on the end of a short leader hose.
- When universal twist couplings are used, lock pins must be installed to prevent accidental hose disconnection.
- Air tools are not intended for use in explosive atmospheres and are not insulated for contact with electric power sources.

### ELECTRICAL HAZARDS

- Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adaptor plugs with earthed (grounded) power tools and equipment. Unmodified plugs and matching outlets will reduce risk of electric shock.
- Avoid body contact with earthed or grounded metal surfaces. There is an increased risk of electric shock if your body is earthed or grounded.
- Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- Do not expose electric power tools and equipment to wet conditions.
- Do not operate power tools in explosive atmospheres. Power tools create sparks which may ignite dust, fumes or flammable liquids.
- Have electric power tools and equipment serviced by a qualified repair person using only identical replacement parts.

### PROJECTILE HAZARDS

- Always wear impact resistant eye and face protection when involved with or near the operation or repair of tools.

### BREATHING HAZARDS

- Proper breathing protection must be worn when working with materials, which produce airborne particles.

### NOISE HAZARDS

- Hearing loss can result from prolonged exposure to excessive sound levels.
- Use hearing protection as recommended by your employer or Occupational Health and Safety Regulations.

### VIBRATION HAZARDS

- Repetitive work motions, awkward positions, and exposure to vibration may be harmful to your hands and arms.
- If numbness, tingling, pain or whitening of the skin occurs, stop using tool and consult a physician.

### ENTANGLEMENT HAZARDS

- To reduce the risk of injury from entanglement, do not wear loose clothing when using rotating accessories.

### ADDITIONAL HAZARDS

- Slip/Trip/Fall is a major cause of serious injury or death. Beware of excessive hose/cord left on the walking or work surface.
- Operators and maintenance personnel must be physically fit to perform job tasks, and handle the bulk, weight and power of the tool.
- Deburring tools should be used to reduce the risk of cuts and abrasions due to burrs.
- Wear gloves to protect hands from sharp edges.

# Safety Instructions

## Specific Safety Instructions for Power Tool Groups

In addition to the General Safety Instructions, the following are safety instructions and warnings that apply to the safe operation of specific power tool groups.

### COMPRESSION TOOLS

- To reduce the risk of injury always keep hands and fingers away from yoke and moving jaws, sets or dies. If possible, hold the tool body with both hands.
- Inspect the yoke daily for cracks. Injury may result if a cracked yoke fails during use.
- All yokes have a life limitation based on cycles and riveting force. This tool and its accessories must not be modified.

### DRILLS & TAPPERS

- Keep away from rotating bit and chuck. You can become cut or burned if you come into contact with the drill bit or tap, chips/swarf, or work surface.
- Use intermittent drill feed pressure to avoid long shaved chips/swarf.
- The drill bit or tap can suddenly bind and cause the workpiece or tool to rotate, causing arm and shoulder injuries.
- It is recommended that side handles are used for operator comfort and safety on high torque drilling applications above 4Nm (3 lbft) on straight case tools and 10Nm (7.4 lbft) on pistol grip drills. Drills with a chuck capacity larger than 10mm (3/8») should always be used with a side handle.

### PERCUSSIVE TOOLS

(Riveting Hammers, Air Scribe)

- All chisels, rivet sets and other associated accessories should be checked for cracks, excessive wear, or other physical damage before each use. Accessories that show signs of damage should be replaced immediately.
- Never use a tool without the proper accessory retainer.

### PULSE TOOLS

- Never use hand sockets or accessories. Use only impact sockets and accessories in good condition. Sockets in poor condition reduce impact power and could also shatter, resulting in personal injury.
- When using a universal joint, never operate the tool off the work. It may run too fast and cause the joint to be thrown from the tool.
- Always use the simplest hook up possible. Long springy extension bars and adaptors absorb impact power and could break loose resulting in personal injury. Instead, use deep sockets wherever possible.
- For tools using the pin and o-ring socket retainer, use the o-ring to securely retain the socket pin or use a one-piece retainer ring to retain the socket.
- Serious injury can result from overtorqued or under-torqued fasteners, which can break, or loosen and separate. Released assemblies can become projectiles. Assemblies requiring a specific torque must be checked using a torque meter.

NOTE: So-called 'click' torque wrenches do not check for potentially dangerous over-torqued conditions.

### ANGLE WRENCHES

- Never use hand sockets or accessories. Use only power drive sockets and accessories.
- To reduce the risk of injury, always support the handle securely in the direction opposite of the spindle rotation to minimize torque reaction.

### ACCESSORIES

- Always use accessories of correct size and design for the tool. Tool and accessories must not be modified in any way.
- Never use a tool without the proper accessory retainer.
- Do not use a tool or attachment for a purpose not intended by the manufacturer.

### OTHER TOOLS

(e.g. Screwdrivers, Shears, Saws, etc.)

- Specific instructions/warnings affecting this group of tools are contained in product-specific documents accompanying each product.

### ABRASIVE TOOLS

- Before grinding, test grinding wheel by briefly running tool at full throttle. Be sure to use a barrier (such as under a heavy work table) to protect yourself from possible broken wheel parts.
- Never mount a grinding wheel on a sander.
- Never use a grinding wheel rated at a speed lower than the air grinder speed.
- All grinding wheels and polishing/sanding accessories should be checked for cracks or other damage before mounting and use.
- Always use the recommended wheel guard to prevent injury when performing grinding operations. If a guard has withstood wheel or disk breakage, it must be replaced.
- Position a guard between the grinding wheel or disc and the operator.
- Use barriers to protect others from fragments and grinding sparks.
- Make sure grinding wheels are mounted according to manufacturer's specifications: always use correct mounting flanges.
- Never tamper with or remove a speed governor from a tool to make it run faster. Periodically check tool speed with a tachometer.

For complete safety instructions, please see the documentation provided with each tool.

# RightWay

The key to finding a better way

Desoutter RightWay focuses on six key areas that play an important part in the performance of your production lines.

## ■ PRODUCTIVITY

Remove bottlenecks to raise workstation productivity and overall line performance.

## ■ QUALITY

Improve the quality of final goods and reduce quality-related costs by implementing advanced error-proofing solutions that detect and fix defects at the workstation.

## ■ ERGONOMICS

Reduce work-related musculoskeletal disorders to improve operator morale, cut absenteeism and minimize operator turnover.

## ■ SAFETY

Fewer on-the-job injuries and the costs associated with lost time and medical costs.

## ■ ENERGY

Fight rising energy costs by adopting energy-efficient best practices and technologies.

## ■ PLANNING

Help you accelerate process improvement projects by providing your planning department with valuable resources and expertise.

Desoutter RightWay uses a unique **4-step methodology** to identify workable improvements to your production line. Our solutions combine real-world insights gathered directly from your production line with our unmatched expertise in tool systems for your industry.

## ANALYSE ON THE FACTORY FLOOR

Desoutter RightWay begins with a 6-point on-site audit of your entire line, workstations and operator ergonomics. Our expert visits the line with you gathering information and observations about your requirements in the six key domains: productivity, quality, ergonomics, safety, energy consumption and process planning.

## PROPOSE DEMONSTRATING FEASIBILITY

Using the results of our Desoutter RightWay audit, the data you provide and our best practices in similar applications, we design and test a custom solution that is perfectly suited to your requirements. In addition, we demonstrate the solution in real-world conditions to show you first-hand how it resolves your issues and concerns.

## FOLLOW-UP IMPLEMENTATION AND SUPPORT

Finally, we work with your line engineers to organize the smooth and timely deployment of the new tool system. Over the life of the system, we will continue to monitor performance and use this feedback to make any adjustments that may be required as your line evolves. We also provide all the preventive maintenance and fixed-price servicing called for in the ROI calculations.

## PROVE PROVE THE PAYBACK

Based on the proposed solution, we calculate the return on investment and the payback in terms of the six domains mentioned earlier. We also propose error-proofing solutions, calculate duty cycles and analyze joint quality for assembly applications.
